

Medical Center facts

THE University of Maryland MEDICAL CENTER is a major, innovative teaching hospital in downtown Baltimore that provides the full range of health care to people throughout Maryland and the Mid-Atlantic region. It is a national and regional referral center for trauma, cancer care, cardiac care, neurocare, women's and children's health and organ transplants. The Medical Center has the most technically advanced imaging and operating room facilities, and it is a recognized leader in developing and performing minimally invasive surgical procedures. The Medical Center is one of the nation's first teaching hospitals, established in 1823.

HIGHLIGHTS

Major components include the R Adams Cowley Shock Trauma Center, the University of Maryland Marlene and Stewart Greenebaum Cancer Center and the University of Maryland Hospital for Children.

The Medical Center is part of the University of Maryland Medical System, a private, not-for-profit **network of nine academic, community and specialty hospitals**, as well as outpatient sites for primary and specialty care throughout Maryland.

All Medical Center physicians are on the faculty of the University of Maryland School of Medicine. Together, the Medical Center and the School of Medicine **train more than half of Maryland's physicians.**

LEADERSHIP IN:

- > Performing **minimally invasive, multiple-vessel heart bypass surgery** using a **surgical robot**. This technique requires a few dime-size holes—no incisions—and enables patients to recover much faster compared to traditional bypass surgery.
- > **Combining minimally invasive heart bypass surgery and stented angioplasty** so that people with several blocked vessels can benefit from both treatments during a single operation.
- > Developing and providing patients with a variety of **lifesaving heart pumps** for severe heart failure.
- > Helping people receive kidney and pancreas transplants with one of the nation's **largest and most active transplant programs.**

- > First in United States to perform more than 1,000 **minimally invasive kidney removals** from living kidney donors. That technique, which the Medical Center began using in 1996, has been widely adopted nationally and has increased kidney donation.
- > Using CT imaging to **rapidly diagnose** the cause of **acute chest pain** when patients come to the Emergency Department.
- > Repairing a life-threatening **injured aorta in trauma patients** with a minimally invasive technique that spares them from having major surgery.
- > Developed Maryland's first **Brain Attack Team** to rapidly evaluate and treat stroke patients with clot-dissolving drugs.

- > First in region to offer **Trilogy**, the fastest, most precise and versatile radiation therapy system available, enabling radiation oncologists to effectively target cancerous tumors.
- > First in Maryland to offer people with liver cancer a targeted radiation treatment called **SIR-Spheres**, in which microscopic radioactive beads are infused directly into the liver to shrink tumors.
- > Built one of the nation's first hospital-based training facilities to advance research and training in minimally invasive surgery, the **Maryland Advanced Surgical Training, Research, and Innovation (MASTRI) Center.**

QUICK FACTS

Human Resources

6,800 Employees
1,065 Attending Physicians

Clinical Activities

705 Total Licensed Beds
278 Intensive Care Beds
35,982 Admissions
1,577 Births
309,011 Diagnostic Imaging Tests
2,778,219 Lab Tests
19,241 Surgeries
7,534 MD ExpressCare Transport Admissions

Visits

64,960 Emergency Dept (adult and pediatric)
8,265 Shock Trauma Center
154,834 Outpatient – Medical Center
287,029 Physician Offices (faculty practice groups of the University of Maryland School of Medicine)

Hospital Operator: 410-328-8667

REFERRAL LINES

Consumers: 800-492-5538
Physicians: 800-373-4111

OUR NATIONAL PROFILE

The University of Maryland Marlene and Stewart Greenebaum Cancer Center has become a **National Cancer Institute-designated cancer center**, because of outstanding research and patient care.

The Leapfrog Group has rated the Medical Center for three years in a row as one of the nation's **top-performing hospitals in patient safety** and quality of care.

Thomson Reuters Healthcare selected the Medical Center as one of the **nation's 100 Top Cardiovascular Hospitals** two years in a row.

The American College of Surgeons has given its **highest accreditation for bariatric surgery** to the UMMC Center for Weight Management.

Get Fit Maryland won a national **Innovation in Prevention Award** from the U.S. Department of Health and Human Services.

The Joint Commission has awarded its prestigious **Gold Seal of Approval** to the UMMC **Brain Attack Center** and to the **Pediatric Asthma Program**. The Gold Seal is given to programs that excel in treating certain diseases.

The **American Heart Association** has recognized UMMC for its efforts to promote the health of its employees with a **Fit-Friendly Company Gold Achievement Award.**
