

Combined Electives for Med-Peds Residents

The following are suggested templates for electives in a variety of subspecialties. Modifications are possible on an individualized basis. Please refer to the medicine and pediatric elective booklets for a more complete description of the requirements, competency-based objectives components of the elective and conferences. Take note of the start times for clinics and the various conferences. Inpatient consultation time should be split evenly between adult and pediatric medicine. Combined electives can also be arranged at the Western Maryland AHEC.

Your electives must be approved by one of the program directors. Please come talk to us at least 8 weeks in advance of your elective so that we can make the proper arrangements. These schedules are subject to change. Please check with the clinic directors before starting your rotation.

Comprehensive level specific competencies are listed in the main curricula for Medicine and Pediatrics. Please refer to these when considering these elective rotations.
